

> — **WHAT TEMPERATURES CAN BE ACHIEVED?**

The heating time and the maximum achievable temperature of a barrel sauna depend on both the type of stove chosen and the rated power of the stove. Customer experiences show that, on average, it takes about 45 minutes to properly heat up a barrel sauna. It is possible to reach temperatures between 90 and 110 degrees Celsius.

> — **IS IT SUITABLE FOR ME?**

Our team will be happy to assist you in ensuring the perfect placement of our garden sauna in your place. We offer personalized guidance and are willing to visit your location to assess the conditions. This will ensure that your sauna experience takes place at the desired time and is tailored to your needs.

> — **HOW MANY PEOPLE IS IT SUITABLE FOR?**

Enjoy undisturbed relaxation with up to 6 people in your favorite spot. For more questions and answers, please visit our website.
